2. BASIS OF PRESENTATION

The financial statements are prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. This basis of accounting differs from that used in the statutory financial statements of the Company's subsidiaries, which were prepared in accordance with the relevant accounting principles and financial reporting regulations applicable to foreign investment enterprises as established by the Ministry of Finance in the PRC. Certain accounting principles stipulated under U.S. GAAP are not applicable in the PRC.

The principal adjustments made to conform the statutory financial statements to U.S. GAAP included the following:

- Reclassification of certain items, designated as "construction-in-progress" in the statutory financial statements, as property, plant and equipment;
- Reclassification of certain items, designated as "long-term land lease prepayments", from property, plant and equipment in the statutory financial statements;
- Reclassification of certain items, designated as "reserves appropriated from net income" in the statutory financial statements, as charges to income;
- Recognition of deferred income taxes;
- Recognition of provision for impairment loss of long-lived assets;
- Recognition of research and development expenditures as intangible assets and related amortization; and
- Recognition of stock-based compensation.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of consolidation

The consolidated financial statements of the Group include the financial statements of the Company and the enterprises that it controls. The equity and net income attributable to minority shareholders' interests are shown separately in the Group's balance sheet and income statement respectively.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

(a) Basis of consolidation (Cont'd)

In 2004, the Group adopted Financial Accounting Standards Board ("FASB") Interpretation No. 46 (revised December 2003), "Consolidation of Variable Interest Entities, an interpretation of ARB No. 51" ("FIN 46R"). FIN 46R addresses the consolidation of an entity whose equity holders either (a) have not provided sufficient equity at risk to allow the entity to finance its own activities or (b) do not possess certain characteristics of a controlling financial interest. FIN 46R requires the consolidation of such an entity, known as a variable interest entity ("VIE"), by the primary beneficiary of the entity. The primary beneficiary is the entity, if any, that is obligated to absorb a majority of the risk of loss from the VIE's activities or entitled to receive a majority of the VIE's residual returns, or both. FIN 46R excludes from its scope businesses (as defined by FIN 46R) unless certain conditions exist.

In connection with the adoption of FIN 46R, the Group has identified a supplier to which the Group had provided a guarantee of approximately RMB300 million, which expired in the first quarter of 2005. The annual purchase from the supplier was approximately RMB92 million in 2005. The Group made and continues to make exhaustive but so far unsuccessful efforts to obtain information necessary to apply the FIN 46R's provision as the Group does not have the contractual or legal right to obtain such information. The Group's maximum exposure to loss as a result of its involvement with this supplier is approximately RMB300 million, representing the guarantee to the supplier in the event of its liquidation. Except the above, the adoption of FIN 46R did not have a material impact on the Group's financial position or results of operations.

Intragroup balances and transactions, including sales to companies within the Group and resulting unrealized profits, are eliminated in full. Unrealized losses resulting from intragroup transactions are eliminated unless the cost cannot be recovered. Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances.

(b) Sales

Sales represent the invoiced value of goods, net of consumption tax, discounts and returns, and are recognized when goods are delivered to the customers and the significant risks and rewards of ownership of the goods have been transferred to customers. Provisions for sales allowances and rebates are made at the time of sales of goods and are recognized as a reduction of sales. Costs related to shipping and handling are included in selling, general and administrative expenses for all periods presented.

(c) Cash, cash equivalents and short-term bank deposits

Cash represents cash on hand and deposits with financial institutions which are repayable on demand. Cash equivalents represent short-term, highly liquid investments which are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

Bank deposits with original maturity between three and twelve months are classified as short-term deposits.

(d) Inventories

Inventories are carried at the lower of cost or market. Cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is calculated on the moving-average basis, except for costs of work-in-progress and finished goods of sedans and minibuses, which are calculated by the specific identification basis. The Group provides allowance for excess, slow moving and obsolete inventory by specific identification and reduces the carrying value of its inventory to the lower of cost or market.

When inventories are sold, the carrying amount of those inventories is recognized as an expense in the period in which the related revenue is recognized.

(e) Property, plant and equipment and long-term land lease prepayments

Property, plant and equipment are stated at cost less accumulated depreciation and impairment loss. The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditure incurred after the assets have been put into operation, such as repairs and maintenance and overhaul costs, is normally charged to the income statement in the period in which it is incurred. In situations where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefits expected to be obtained from the use of the assets beyond its originally assessed standard of performance, the expenditure is capitalized as an additional cost of the assets.

Depreciation is calculated on a straight-line basis, at annual rates estimated to write off the cost less estimated residual value of 10% of each asset over its expected useful life. The annual rates are as follows:

Buildings	5%
Machinery and equipment (excluding special tools and moulds)	10%
Furniture, fixtures and office equipment	20%
Motor vehicles	20%

The costs of special tools and moulds included in machinery and equipment are amortized over their estimated productive volume.

When property, plant and equipment are sold or retired, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is included in the income statement.

Construction-in-progress consists of factories and office buildings under construction and machinery pending installation and includes the costs of construction, machinery and equipment, and any interest charges arising from borrowings used to finance these assets during the period of construction or installation. No provision for depreciation is made on construction-in-progress until such time as the relevant assets are completed and ready for their intended use.

Long-term land lease prepayments are amortized on a straight-line basis over the term of lease.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

(f) Intangible assets

Purchased intangible assets with finite lives are amortized using the straight-line method over the estimated economic lives of the assets of 7 years.

(g) Impairment of long-lived assets

Long-lived assets, such as property, plant and equipment and purchased intangible assets with finite lives, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable from its undiscounted future cash flow. If such assets are considered to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets.

(h) Goodwill

Goodwill represents the excess of the purchase price over the fair value of the net assets resulting from the Company's acquisitions of interests in its subsidiaries.

Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets," which was effective for the Group for year 2002, prohibits the amortization of goodwill and purchased intangible assets with indefinite useful lives. The Group reviews goodwill for impairment annually at the year end and whenever events or changes in circumstances indicate the carrying value of an asset may not be recoverable in accordance with SFAS No. 142.

The Group performs a two-step impairment test. In the first step, the Group compares the fair value of each reporting unit to its carrying value. The Group determines the fair value of its reporting units based on the present value of estimated future cash flows. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not impaired and no further testing is performed. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value of the reporting unit, then the Group must perform the second step impairment test in order to determine the implied fair value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, the Group records an impairment loss equal to the difference.

(i) Investments in associated companies and jointly controlled entities

An associated company is a company in which the Group has significant influence, but not control or joint control, and thereby has the ability to participate in the investees' financial and operating policy decisions. A jointly controlled entity is a company in which the Group has joint control with the other joint venture partners. Investments in associated companies and jointly controlled entities are accounted for using the equity method ("equity method investment"). Goodwill arising on the acquisition of interests in associated companies and jointly controlled entities ("equity method goodwill") is included in the carrying cost of the investment. The Group considers whether the fair values of any of its equity method investments have declined below their carrying value whenever adverse events or changes in circumstances indicate that recorded values may not be recoverable. In assessing the recoverability of equity method investments (including equity method goodwill), the Group uses discounted cash flow models. If the fair value of the equity investee is determined to be lower than carrying value, an impairment is recognized.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

(j) Investment securities

The Group's investment securities consist of marketable available-for-sale securities and investments in unlisted equity securities. Securities classified as available-for-sale under SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," are carried at fair value, with unrealized gains and losses, net of income taxes, recorded in the accumulated other comprehensive income (loss), a separate component of statement of changes in shareholders' equity, until realized. The fair values of individual investments in marketable securities are determined based on market quotations. Gains or losses on securities sold are based on the specific identification method. Equity securities that are restricted for more than one year or not publicly traded are recorded at cost.

The Group periodically assesses whether its investments in non-marketable equity securities and available-for-sale securities are impaired and if any impairment is other than temporary. Factors considered in assessing whether an impairment is other than temporary include the credit quality of the investment, the duration of the impairment, the Group's ability and intent to hold the investment until recovery and overall economic conditions. A decline in value of these securities below cost that is deemed to be other than temporary results in an impairment charge to earnings that reduces the carrying amount of the securities to fair value establishing a new cost basis.

(k) Taxation

Income Tax

The Company was incorporated under the laws of Bermuda and has received an undertaking from the Ministry of Finance in Bermuda pursuant to the provisions of the Exempted Undertakings Tax Protection Act, 1966, which exempts the Company and its shareholders, other than shareholders ordinarily residing in Bermuda, from any Bermuda taxes computed on profit, income or any capital asset gain or appreciation, or any tax in the nature of estate duty or inheritance tax, at least until year 2016.

The general VAT rate applicable to sales and purchases of minibuses, sedans and automotive components in the PRC is 17%.

Sale of minibuses and sedans is also subject to consumption tax at standard rates of 5% to 12%.

The functional currency of the Company and its subsidiaries is RMB. Transactions denominated in foreign currencies are translated into RMB at exchange rates prevailing at the date of transactions. Non-monetary assets and liabilities denominated in foreign currencies are translated into RMB using the applicable exchange rates prevailing at the time of transaction.

Foreign currency translation adjustments in other comprehensive income arose from the Company's change in functional currency in previous years.

(n) Warranty

A provision is recognized when an enterprise has a present obligation (legal or constructive) as a result of a past event and it is probable (i.e. more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligations. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Shenyang Automotive's minibuses are sold with a 24-month or 50,000 kilometers (2005 and 2004: same) first-to-occur limited warranty. (r) Stock-based compensation (Cont'd)

Through the year ended December 31, 2005, the Company followed the disclosure-only provisions of SFAS No. 123, "Accounting for Stock-Based Compensation", ("SFAS 123"), and, accordingly, accounted for awards under these plans pursuant to the recognition and measurement principles of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees", ("APB 25") and related Interpretations, as permitted by SFAS 123. Under APB 25, compensation expense was recognized in the financial statements relating to awards of stock. However, no compensation expense was recorded in the financial statements for stock option grants, as all options have been granted with an exercise price equal to the market value of the underlying common stock on the date of grant.

Effective from January 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123R, "Share-Based Payments", ("SFAS 123R") using the modified prospective transition method. SFAS 123R revises SFAS 123, supersedes APB 25 and amends SFAS No. 95, "Statement of Cash Flows". Under the modified prospective transition method, compensation expense is recognized in the financial statements on a prospective basis for (a) all share-based payments granted prior to, but not vested as of January 1, 2006, based upon the grant-date fair value estimated in accordance with the original provisions of SFAS 123, and (b) share-based payments granted on or subsequent to January 1, 2006, based upon the grant-date fair value estimated in accordance with the provisions of SFAS 123R. The grant-date fair value of awards expected to vest is expensed on a straight-line basis over the vesting period of the related awards. Under the modified prospective transition method, results for prior periods are not restated.

Details of share options granted by the Company and their fair value are set out in Note 23.

(s) (Loss) earnings per share and (loss) earnings per ADS

The calculation of basic (loss) earnings per share is based on the net (loss) income for the year and the weighted average number of shares of common stock outstanding during the year.

The calculation of diluted (loss) earnings per share is based on the net (loss) income for the year and the weighted average number of shares of common stock and adjusted for the effects of all dilutive potential shares of common stock outstanding during the year.

A reconciliation of the net (loss) income used in the calculation of basic and diluted (loss) earnings per share/ADS is as follows:

	Year ended December 31,		
	2006	2005	2004

A reconciliation of the weighted average number of shares of common stock used in calculation of basic and diluted (loss) earnings per share is as follows:

	Year ended December 31,		
	2006	2005	2004
Weighted average number of shares of common stock used in calculation of basic (loss) earnings per share	3,668,390,900	3,668,390,900	3,668,390,900

As the Company was in loss position for 2006, 733,674,602 and 38,550,000 potentially dilutive stocks for the year ended December 31, 2006 from conversion of the convertible bonds and outstanding share options respectively, were excluded from the calculation of diluted loss per share because to do so would be anti-dilutive.

As the Company was in loss position for 2005, 336,956,522 and 6,258,959 potentially dilutive stocks for the year ended December 31, 2005 from conversion of the convertible bonds and outstanding share options respectively, were excluded from the calculation of diluted loss per share because to do so would be anti-dilutive.

The diluted earnings per share/ADS calculation for the year ended December 31, 2004 was based on weighted average number of common stocks/ADSs outstanding plus the weighted average number of shares/ADSs deemed to be issued as if all outstanding share options granted had been exercised.

For the year ended December 31, 2004, 336,956,522 potentially dilutive stocks from conversion of the convertible bonds were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

A reconciliation of the weighted average number of ADSs for calculation of basic and diluted (loss) earnings per ADS is as follows:

	Year ended December 31,		
	2006	2005	2004

(t) Segmental information

Segmental information is presented in accordance with SFAS No. 131 "Disclosures about Segments of an Enterprise and Related Information" which establishes standards for reporting information about operating segments on a basis consistent with the Company's internal organization structure as well as information about geographic areas and major customers. Disclosure of segmental information in accordance with SFAS No. 131 is made in Note 30.

(u) Comprehensive income

SFAS No. 130 "Reporting Comprehensive Income" requires the components of comprehensive income to be disclosed in the financial statements. Comprehensive income consists of net income, the net unrealized gains or losses on available-for-sale marketable securities, foreign currency translation adjustments, minimum pension liability adjustments and unrealized gains and losses on financial instruments qualifying for hedge accounting. For the Group, such items consist primarily of unrealized gains and losses on marketable equity investments and foreign currency translation adjustments. The Group has disclosed comprehensive income, which encompasses net (loss) income in the statement of income and other comprehensive income.

(v) Convertible bonds

Convertible bonds issued at par are stated in the balance sheet at face value plus accreted redemption premium which is calculated based on the outstanding principal of the convertible bonds using effective interest method so that the carrying value of the bonds equals to the redemption price on the redemption date. Direct expenses in connection with the issuance of convertible bonds are capitalized as deferred expenses on the balance sheet and are amortized over the life of the convertible bonds.

(w) Guarantees

Guarantee issued by the Group is initially recognized on the balance sheet as a liability at the fair value, or market value, of the obligations the Group assumed under that guarantee in accordance with FIN 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others". FIN 45 is applicable on a prospective basis to guarantees issued or modified after December 31, 2002. FIN 45 also contains disclosure provisions surrounding existing guarantees, which are effective for financial statements with periods ended after December 15, 2002. As of December 31, 2006 and 2005, the fair values of the guarantees the Group entered into after December 31, 2002 are not material to the Group's financial position. Please refer to Notes 3(n) and 21(c) for details.

(x) Allowance for doubtful accounts

Accounts receivable are stated at the amount billed to customers. The Group recognizes allowance for doubtful accounts to ensure trade and other receivables are not overstated due to uncollectibility. The Group's estimate is based on a variety of factors, including historical collection experience, existing economic conditions and a review of the current status of the receivable. Accounts past due more than the Group's general credit period are considered delinquent. Delinquent receivables are written off based on individual credit evaluation and specific circumstances of the customer.

(y) Fair value of financial instruments

The estimated fair values for financial instruments under SFAS No. 107, "Disclosures about Fair Value of Financial Instruments", are determined at discrete points in time based on relevant market information. These estimates involve uncertainties and cannot be determined with precision. The estimated fair values of the Group's financial instruments, which include cash, accounts receivable, intercompany receivables and payables and other payables, approximate their carrying values in the financial statements.

(z) Other new accounting pronouncements

In July 2006, the FASB issued FIN 48, "Accounting for Uncertainty in Income Taxes", which clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with SFAS No. 109, "Accounting for Income Taxes". FIN 48 provides guidance on the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition. FIN 48 is effective for years beginning after December 15, 2006. The Group does not expect the adoption of FIN 48 will have a material impact on its financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements", which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies under other existing accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, SFAS 157 does not require any new fair value measurements. However, the application of this statement may change the current practice for fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Group does not expect the adoption of SFAS 157 will have a material impact on its financial statements.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities", which permits entities to choose to measure financial instruments and certain other items at fair value that are not currently required to be measured at fair value. SFAS 159 will be effective for the Group on January 1, 2008. The Group does not expect the adoption of SFAS 159 will have a material impact on its financial statements.

4. SUBSIDY INCOME

During the year, the Company's subsidiaries were granted government subsidies of RMB73,210,000. All of the approved subsidies were received by the Group during the year. For the years ended December 31, 2006, 2005 and 2004, government subsidies of RMB50,176,000, RMB3,139,000 and RMB1,815,000 were recorded as income respectively.

5. INCOME TAXES

For the years ended December 31, 2006, 2005 and 2004, certain of the Company's subsidiaries were subject to income taxes in the PRC at the applicable statutory tax rates on allowable losses or taxable income as reported in the statutory financial statements adjusted for the reduced tax rates and exemptions described in Note 3(k).

The amount of (provision) benefit for income taxes in the consolidated statement of income represents:

	Year ended December 31,		
	2006 RMB'000	2005 RMB'000	2004 RMB'000
Current taxation	(47,879)	12,121	(11,340)
Deferred taxation	—	(114,005)	74,450
	(47,879)	(101,884)	63,110

The reconciliation of the Group's effective income tax rate, based on (loss) income before taxes and minority interests, to its statutory income tax rate for years ended December 31, 2006, 2005 and 2004 is as follows:

	Year ended December 31,

For the year ended December 31, 2006, no impairment loss (2005: RMB173 million) was provided for assets related to Zhonghua sedans.

For each of the five years ending December 31, 2010, the estimated amortization expense of the intangible assets in existence as of December 31, 2006 will be approximately RMB177.8 million.

("SXI"), respectively. SAIAM is interested in 24.38% and SXI is interested in 8.97% of the equity interest in JinBei, a company listed on the Shanghai Stock Exchange. The consideration for the acquisitions was RMB600 million and was determined after arm's length negotiations between the parties taking into account the respective financial position of SAIAM and SXI.

Although the acquisitions have been approved by State-Owned Assets Supervision and Administration Commission of Liaoning Provincial Government and State-owned Assets Supervision and Administration Commission of the State Council of the PRC, the transfer of the entire interest of SAIAM and SXI is subject to the granting of a waiver to SXID and SJAI from making an offer for all of the shares of JinBei under the Regulation on Acquisitions of Listed Companies by the China Securities Regulatory Commission. (c) Contingent liabilities

(i) As of December 31, 2006, the Group had provided the following guarantees:

- (1) Corporate guarantees of approximately RMB120 million (2005: RMB120 million) for revolving bank loans and notes drawn by affiliated companies of Shanghai Shenhua:

The guarantee arose from the mutual negotiation between Shenyang Automotive and Shanghai Shenhua. Associated with the corporate guarantee, Shanghai Shenhua also provided a cross guarantee for the bank facilities of Shenyang Automotive. The guarantee was for revolving activities of Shanghai Shenhua and will be terminated upon mutual agreements between Shenyang Automotive and Shanghai Shenhua. If Shanghai Shenhua defaults on the repayment of its bank loans or notes when they fall due, Shenyang Automotive is required to repay the outstanding balance. There is no recourse or collateralization provision in the guarantee. As of December 31, 2006, the guarantee provided for the bank loans and notes drawn by affiliated companies of Shanghai Shenhua was approximately RMB120 million (2005: RMB120 million), which is also the maximum potential amount of future payments under the guarantee as of December 31, 2006. However, default by Shanghai Shenhua and its affiliated companies is considered remote by management and therefore no liability for the guarantor's obligation under the guarantee existed as of December 31, 2006.

- (2) A joint and several proportional corporate guarantee with a shareholder of Shenyang Aerospace on a long-term bank loan of approximately RMBNil million (2005: RMB111 million) drawn by Shenyang Aerospace which will expire in 2008:

The guarantee was provided by the Group and a shareholder of Shenyang Aerospace for its long-term loan financing needs during its start-up period. If Shenyang Aerospace defaults on the repayment of its bank loan when it falls due, the Group and the shareholder are jointly and severally liable to repay the outstanding balance. There is no recourse or collateralization provision in the guarantee.

- (3) Corporate guarantees of bank loans amounting to RMB295 million (2005: RMB295 million), which is also the maximum potential amount of future payments under the guarantee as of December 31, 2006, drawn by JinBei. Bank deposits of RMB312 million (2005: RMB311 million) were pledged as collateral for the corporate guarantees. However, default by JinBei is considered remote by management and therefore no liability for the guarantor's obligation under the guarantee existed as of December 31, 2006.

(ii) On or about October 25, 2002, the Company was served with a claim lodged by Mr. Yang Rong ("Mr. Yang") in the Labour Tribunal in Hong Kong against the Company for alleged wrongful repudiation and/or breach of his employment contract. In addition, Mr. Yang claimed unspecified damages in respect of bonuses and share options. The claim was dismissed by the Labour Tribunal in Hong Kong on January 28, 2003. Mr. Yang subsequently applied for a review of this decision. At the review hearing on July 4, 2003, the Labour Tribunal ordered the case to be transferred to the High Court in Hong Kong. The claim has therefore been transferred to the High Court and registered as High Court Action No. 2701 of 2003 (the "Action").

23. STOCK OPTIONS

Original share option scheme approved in 1999

Upon the listing on the Company's shares on the SEHK, the Company adopted an employee share option scheme (the "Scheme"). Pursuant to the Scheme, the Company's board of directors may grant options to employees of the Group to subscribe for the Company's common stock at a price which shall be the higher of:

- (a) a price being not less than 80%, of the average closing price of the common stock on the relevant stock exchange as stated in such stock exchange's quotation sheets for the five trading days immediately preceding the relevant date in respect of such options; and
- (b) the nominal value of the common stock.

The maximum number of shares on which options may be granted may not exceed 10% of the issued share capital of the Company excluding any shares issued on the exercise of the option from time to time.

On June 2, 2001, share options were granted to certain directors and employees of the Group, entitling them to subscribe for a total of 31,800,000 shares of the Company's common stock at HK\$1.896 per share. The exercisable period of these options is from June 2, 2001 to June 1, 2011. The compensation expense associated with these grants was fully vested and was charged to income during the year ended December 31, 2001. During the year ended December 31, 2003, 2,338,000 shares of the above share options were exercised. Accordingly, the common stock and additional paid-in capital increased by approximately RMB194,000 and RMB4,507,000, respectively. No option was granted under the Scheme from 2004 to 2006.

23. STOCK OPTIONS (Cont'd)

New share option scheme approved in 2002

On June 28, 2002, the Company adopted a new share option scheme (the "New Scheme") in compliance with the amendments to the listing rules and regulations of SEHK which came into effect on September 1, 2001. The New Scheme came into effect on July 15, 2002 and the original share option scheme adopted by the Company on September 18, 1999 (as described above) was terminated. Any new share option granted after July 15, 2002 will be in accordance with the terms of the New Scheme, but the outstanding share options granted under the original share option scheme in 2001 will not be affected. Pursuant to the New Scheme, the Company's board of directors may grant options to the participants (include the Group's employees, non-executive directors, suppliers and customers, etc.) to subscribe for the Company's common stock at a price which shall not be lower than the higher of:

- (a) the closing price of the common stocks on the relevant stock exchange as stated in such stock exchange's quotation sheet on the date of the offer of grant, which must be a trading date;
- (b) the average closing price of the common stocks on the relevant stock exchange as stated in such stock exchange's quotation sheets for the five trading days immediately preceding the date of the offer of grant; and
- (c) the nominal value of the common stock.

Movements of outstanding share options granted under the New Scheme during the year are as follows:

	No. of share options	
	2006	2005
	'000	'000
Granted during the year and as at 31st December,	35,750	—

The options under the New Scheme were granted for a nominal consideration of HK\$1 per person. Each of the outstanding share options under the New Scheme entitles the holder to subscribe for one ordinary share of the Company at HK\$1.32, exercisable from December 28, 2006 to December 27, 2016.

In accordance with the terms of the share-based arrangement, options issued during the year vest at the date of grant.

The fair value of the share options granted during the year is HK\$11,221,493 (equivalent to approximately RMB11,281,000), which was calculated using the Black-Scholes option pricing model and recognised as an expense in the statement of income. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions and behavioural consideration. Due to the restriction on the transferability of the share options, the option holders tend to early exercise the options on hand. Therefore, management considers it is appropriate to assume that the option holders will exercise their options earlier as it is the only way for them to realise their option value. Such expected time of exercise constitutes the expected tenors of the options, which are adopted in the calculation of the fair value of the options. The expected tenors for options held by the directors and other employees are two years and one year respectively. Expected volatility is based on the historical price volatility over the past 260 days.

23. STOCK OPTIONS (Cont'd)

On December 18, 2002, Huachen entered into a principal agreement (the "Principal Agreement") with the Chinese Financial Education Development Foundation (the "Foundation") to purchase from the Foundation a total of 1,446,121,500 shares of common stock, representing approximately 39.446% of the then issued share capital of the Company and the Foundation's entire shareholding interests in the Company. Completion of the Principal Agreement took place upon signing.

On December 18, 2002, each of Mr. Wu Xiao An, Mr. Su Qiang, Mr. Hong Xing and Mr. He Tao (the "Management Directors") entered into a call option agreement ("Call Option Agreements") with Huachen, immediately after the Principal Agreement was entered into and after completion of the sale and purchase of the common stocks pursuant thereto. Pursuant to the terms of the Call Option Agreements, Huachen granted to each of the Management Directors a call option in respect of a specified number of shares of common stock, totaling 346,305,630 shares in aggregate and representing approximately 9.446% of the then issued share capital of the Company, at an exercise price of HK\$0.95 per share. Each call option is exercisable in whole or in part at any time during the period of 3 years commencing from the date falling 6 months after February 6, 2003, the closing date of the general offer made to the remaining shareholders by Huachen and the Management Directors dated December 18, 2002.

Under the terms of the Call Option Agreements, the Management Directors may elect to pay the exercise price in full or to pay 10% of the exercise price at the time of exercise of the option. If the Management Directors elect the latter payment option, the balance of the exercise price will be payable, without interest, within a 3-year period after the date of completion of the purchase of the relevant common stock, and the shares will be pledged as security in favor of Huachen until full payment of the exercise price.

As a result of the Call Option Agreements entered into between Huachen and the Management Directors, compensation expense associated with these call options is being recognized by the Company on a straight-line basis from December 18, 2002 to August 6, 2003, the date that the call options became fully vested. Accordingly, compensation expenses of approximately RMB173.2 million and RMB10.3 million were charged to the income statements for the years ended December 31, 2003 and 2002, respectively.

30. SEGMENT INFORMATION

SFAS No. 131 establishes standards for reporting information about operating segments in financial statements. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance.

The Group began manufacturing and selling Zhonghua sedans and BMW sedans, respectively, which are managed separately because each of them represents a strategic business unit that serves a different market in the automobile industry. Therefore, the Group's reportable operating segments consist of i) manufacture and sale of minibuses and automotive components; ii) manufacture and sale of Zhonghua sedans; and iii) manufacture and sale of BMW sedans.

The accounting policies of each operating segment are the same as those described in the summary of significant accounting policies. The Group evaluates performance based on stand-alone operating segment net income and generally accounts for intersegment sales and transfers as if the sales or transfers were to third parties, that is, at current market prices. The Group's activities are conducted predominantly in the PRC. Accordingly, no geographical segmentation analysis is provided.

The Group's credit risk primarily consists of receivables from a variety of customers including state and local agencies, municipalities and private industries. The Group had one customer and its affiliates (see Note 25(f)) that accounted for more than 10% of revenues. The Group reviews its accounts receivable and provides estimates of allowances as deemed necessary.
